

S4® *RooFit*

One Plate. Infinite Possibilities.

Durability exceeding 25 years
10 Year Warranty

With S4's lateral extension rails, you're free to design your layout without constraints.
Adapt to any width no redesign needed. It's freedom made simple.

S4[®] RooFit

Only 5 accessories needed

STAINLESS STEEL SCREW FOR CLAMPS
6.5 X 60MM + EPDM WASHER

SINGLE CLAMP

HEXAGONAL HEAD SCREW
6.5 x 25 MM FOR FIXING THE PLATE.

FLASHING HOOKS

LATERAL FLASHING

Key Advantages

1. Full height universality

Adapts to all panel heights from legacy models to future generations thanks to modular vertical extensions.

2. Full width universality

Universal horizontal extensions fit every panel width with no format limitation.

3. Guaranteed compatibility for decades

Future-proof design ensures long-term continuity even as panel standards evolve.

4. Simplified panel replacement

If panel sizes change, only the modules are replaced while the S4 RooFit base stays intact.

5. Portrait or landscape orientation

Both orientations possible without extra parts or added cost, offering total on-site freedom.

6. Integrated waterproofing and finishing

No need for top flashings as full waterproofing is built directly into the system.

7. Only five components in total

Ultra-simplified design reduces costs, errors, and logistics complexity.

8. Mixed orientations on the same roof

Combine portrait and landscape panels to optimize every surface.

9. No battens in portrait mode

Direct fixing streamlines preparation and accelerates installation.

10. Reduced battens in landscape mode

Only one horizontal batten is needed between rows for secure and efficient fixing.

Technical Features

- Colour accessories Black (100% recyclable)
- Material PP Aluminium Stainless Steel (100% recyclable)
- Temperature Range Utilisation -20° + 85°
- Pitch 12° to 70°
- Public liability Insurance BB European Group SE
